

MEMORANDUM FOR: Chief, Technical Services Division, DDS

SUBJECT: Pureed Food for Aircrew Members of
High Altitude Aircraft

Subject food is currently procured from commercial sources in disposable metal tubes. It is requested that four prototype plastic refillable squeeze type containers with a capacity of not less than 7 1/2 oz. be obtained for field testing by this organization as a replacement for the current items. A threaded opening to accept the enclosed pen tube is required. The plastic material should be capable of repeated sterilization by boiling in water. The tubes will be utilized for inflight meals of commercially prepared pureed fruit.

SIGNED

JACK C. LEDFORD
Colonel USAF
Assistant Director
(Special Activities)
